Bringing a unique joint practitioner and academic perspective to the topic, this is the only available text on private equity truly international in focus. Examples are drawn from Europe the Middle East, Africa and America with major case studies from a wide range of business sectors, from the prestigious collection of the London Business School's Coller Institute of Private Equity. Much more than a simple case book, however, International Private Equity provides a valuable overview of the private equity industry and uses the studies to exemplify all stages of the deal process, and to illustrate such key topics as investing in emerging markets; each chapter guides the reader with an authoritative narrative on the topic treated. Covering all the main aspects of the private equity model, the book includes treatment of fund raising, fund structuring, fund performance measurement, private equity valuation, due diligence, modeling of leveraged buyout transactions, and harvesting of private equity investments.
